## DOOR SWITCH

DS 013

## > Tool-free adjustable switch positioning > High switching capacity <br> > Strain relief, suitable for range of cable diameters <br> > Suitable for lamp LED 025 and other devices

The door switch monitors the position of cabinet doors and is available in three versions. For example, it can be used for switching a light when opening a door (NC), or to activate a fan when closing a door (NO). The version with change-over contact (CO) can be used as a normally closed and/or normally open contact. The wide mechanical adjustment range of the door switch DS 013 offers versatile mounting: the housing is adjustable within a $1-3 / 8^{\prime \prime}(35 \mathrm{~mm})$ range, while the screw flange with a slotted hole offers an additional $13 / 16^{\prime \prime}(21 \mathrm{~mm})$. The travel of the switch itself is another $5 / 16^{\prime \prime}(8 \mathrm{~mm})$.
